

SPECIFICATIONS

BLOWER

- Blower Roots
 Model: 1125 DVJ Tri-Nado
 Type: Tri-Lobe Direct Drive
- Drive OMSI air-shift transfer case, power frame-mounted
- Speed 2,000 RPM
- Blower Vacuum 27" HG (685.8mm)
- Blower Airflow 2,812 CFM @ 27" HG (79.6m³/min @ 685.8mm HG), 5,800 CFM (164m³/min) free air

DEBRIS TANK

- Volumetric Capacity 18 yds.³ (13.8 m³)
- Dump Angle 40°
- · Sides .250" thick steel
- Construction 91" (2.3mm) diameter rolled steel plate, debris body, baghouse & dump chute are integrated, welded construction allowing for complete removal of all debris when dumping
- Lifting Hydraulic 2-stage telescopic cylinder
- Tailgate Heavy-duty rear, full 90° hydraulically opening with dual positive locking reverse angle wedges
- Debris Body Safety Prop Single, manually-operated prop located on hoist frame near rear axle(s)
- Tailgate Safety Prop Located outside be side tailgate driver side
- Body Dumping Controls Manuallyoperated spool-type hydraulic control valve

CONTROLS

- Control Panel Heavy-duty waterresistent steel housing with lockable door, includes: air pressure gauge, vacuum gauge, tachometer with hourmeter, throttle control, emergency stop, control panel light, vacuum relief, blower temperature gauge, pulsation control with timer for baghouse cleaning & switches for optional lights
- Blower Engaged via air-shifted transfer case
- **Hydraulics** Engaged via air-shifted transfer case
- Body Dump & Tailgate Open & close functions via manually-operated spool-type hydraulic control valve

FILTRATION

- Debris Tank Chains Optional chain filters for both debris tank inlet & outlet
- Dual Cyclone Filters Self-cleaning with sealed cleanout door at bottom of dump chute
- Baghouse Contains 60 easily removable/replaceable bags with sealed cleanout door at the bottom of baghouse, optional air cannon for reverse air flow bag cleaning

HYDRAULIC SYSTEM

- Hydraulic Pump Fixed displacement gear pump for reliability & simplicity with JIC fittings
- Hydraulic Reservoir 80 gal. (302.8L)
- · Suction Filter 150 micron
- Return Filter 10 micron

GENERAL SPECIFICATIONS

- Drive Split-shaft PTO with direct drive to blower
- Silencer Inlet & outlet silencers based on blower requirements
- Electrical 12 Volt, all connections identified & labeled in the control box

OPTIONS

- Wireless Pendant Controls vacuum relief & engine RPM
- Sludge Pump
- · Brass Slam Valve
- Baghouse Air Cannon For reverse air flow bag cleaning with pulsation timer
- Full Load Indicator
- · Hydraulic Debris Body Vibrator
- · Platforms & Steps
- · Manual or Hydraulic Boom
- · Work Lights
- · Strobe Lights
- · Tool Boxes

DIMENSIONS	MACHINE MODEL NUMBERS
	AVRB18
A. Overall Height	12' 9", (3.9m)
B. Overall Length	34' 4", (10.5m)
C. Clear CA Required	191.5", (4.9m)
D. Overall Width	8'10", (2.7m)

NOTE: All dimensions shown are applicable to Freightliner 114-SD Chassis only.

Form No. 11844 • 11/24 Printed in U.S.A

Vacall machines are designed and manufactured by Gradall Industries LLC, a world leader in the production of versatile, reliable maintenance machines. It is our policy to continually improve our products. Therefore, designs, materials and specifications are subject to change without notice and without incurring any liability on units already sold. NOTE: some options shown in pictures.
